2nd International Conference on ICT Solutions for Justice (ICT4Justice '09)

24th SEPTEMBER 2009
Club of the Members of the Parliament
Bul. Teodosij Gologanov br. 45
Skopje, Macedonia

Goal:

The ICT4JUSTICE conference aims to foster the experience exchange in establishing and enhancing the national e-justice systems, especially to share different experiences at portals, integration, applications, and examples of good practices, to present world's latest trends in e-justice sector, and the future oriented services in justice sector. The conference will make possible to:

- Share experience in increasing the efficiency of national judicial systems and corresponding trends in the world,
- Explore the possibilities for integration of e-justice services and systems at the EU level,
- Present the most advanced ICT-supported legal services to citizens, the public sector and business, and share experience in managing legal information (e-law),
- Analyse issues such as privacy, information security, non repudiation, and long term archiving of legal documents.

Sponsored by J-WeB

Supported by JUMAS

Projects co-funded by the European Commission FP6 & FP7
